Digital Email Forensic Investigation Report

1. Case Information

Case ID	MT-20260913181910-B258E4
Generated At	2026-09-13 18:19:10
Filename	legitimate_jury_test.eml
Sender	Project Coordinator <coordinator@college.example>
Receiver	student@example.com
Subject	Project Review Meeting

2. Threat Risk Assessment

Risk Score	17.05 / 100
Risk Level	LOW
Primary Threat	No Major Content Threat Detected
Recommended Action	No immediate threat detected; continue normal monitoring.

3. Machine Learning Analysis

Classification: Legitimate Email

Confidence: 35.23%

Threat Class	Probability
Legitimate Email	35.23%
Business Email Compromise	7.58%
Social Engineering	7.36%
Phishing	7.29%
Malware Delivery	7.27%

4. Email Header Forensics

Authentication	Status
SPF	PASS
DKIM	PASS
DMARC	PASS
Header Anomalies	0

5. Indicators of Compromise

IOC Type	Count
Emails	3
URLs	0
Domains	2

IP Addresses	0
MD5	0
SHA1	0
SHA256	0

6. Geo Intelligence

City: Chandigarh

Region: Chandigarh

Country: India

Latitude: 30.7333

Longitude: 76.7794

Infrastructure: Demo Educational Infrastructure

7. Explainable Findings

IOC Analysis [MEDIUM] — 5 indicators of compromise were extracted.

8. Threat Graph Summary

Graph Nodes: 6

Graph Relationships: 5

Forensic Notice: Geo intelligence represents approximate infrastructure-level or controlled demo location data. It must not be interpreted as an exact physical location of a sender.
